WORK EXPERIENCE

[Software Developer ///](#) 2022 -> Now

Company - Pyramidion Solutions pvt ltd

Year - September 2022 – till now

Roles & Responsibilities –

Integrating user-facing elements developed by Back-end developers with server-side logic. Writing reusable, testable, and efficient code. Designing and implementing low-latency, high-availability, and performant applications. Integrating user-facing elements developed by front-end developers with server-side logic. Implementing security and data protection. Developing and deploying micro services. Building and maintaining RESTful APIs. Optimizing applications for maximum speed and scalability. Utilizing various Node.js modules and libraries. Troubleshooting and debugging applications. Collaborating with other team members and stakeholders

PROJECTS -

1. Allo Taxi

A Taxi app was developed, to book rides online which had few logics to work on, locating the providers and assigning ride, implementing payment gateway, verifying the user and provider, developing two different applications for user and provider as per the client need, Admin Panel in web to access both user and provider app

Tech-used : Node Js, My Sql database, AngularJs

I have also supported in many more taxi apps using same tech, i.e., **Chalo Taxi**, **Zig Taxi**, **Go Book a ride**, **Y-ride**

2. Pet Terminal

Owners are getting busy to take care of their pets, an app was developed for the owners to remind themselves about the pet's daily life, many key features were to be added like locating the pet clinics, reminders and notification to feed the pet, their doctor appointments.

Tech-used : Node Js, My Sql database, AngularJs

3. Sura Guide

An app was developed for 10th 11th 12th students, this app contains all the portions and previous exam question papers. The data for each year differs so the data to be shown will be written in xml and parsed using php

PROFILE
